## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 22, 2006 has been entered.

2. Claims 11-15 and 17-21 are pending. Claims 1-10 and 16 have been cancelled. Claim 11 has been amended.

3. Claims 11-15 and 17-21 stand rejected under 35 USC 103(a) rejection over (Romack et al. (US 6,200,352) in view of Octadecylamine document ([www.ams.usda.gov/nop/nationallist/tapreviews/octadecylamine.pdf](http://www.ams.usda.gov/nop/nationallist/tapreviews/octadecylamine.pdf)) for the reasons set forth in the previous office action. The rejection of the claims is maintained.

### ***Response to Arguments***

4. Applicant's arguments regarding the 35 USC 103(a) rejection have been fully considered but they are not persuasive. The applicants argue:

"Data supporting" dramatically improved cleaning performance" is presented in the table on page 15 of the specification, which summarizes the results of twelve examples conducted to illustrate the advantages of the claimed invention and the criticality of the presence of the undissolved surfactant. No expert's declaration is needed in this prosecution because the unexpected results data in the specification are already so extensive."

The examiner respectfully disagrees. The table on page 15 of the instant specification is not commensurate in scope with the claims. The table is directed towards only a few species of surfactants and not the generic disclosure of surfactants in claim 11. Furthermore the table does not identify the percentages of undissolved surfactant used in each example. The table further is not commensurate in scope with the surfactant ranges of the prior art.

Romack et al. does disclose that the surfactant is soluble in the co-solvent, they also disclose that the surfactant may not be soluble in carbon dioxide (column 2, lines 1-10). Romack et al. teach compositions with as low as 0.01% organic co-solvent and as high as 10 percent surfactant with the balance being water and CO<sub>2</sub> (column 2, lines 54-65). The applicant has not provided a showing that these ranges do not provide a composition with at least 10% undissolved surfactant and the patent office is not equipped to perform this measurement. Therefore the table is insufficient to overcome the rejection of the claims under Romack in view of the Octadecylamine document.

All disclosures of the prior art, including non-preferred embodiment, must be considered. See *In re Lamberti and Konort*, 192 USPQ 278 (CCPA 1967); *In re Snow*

Cir. 1989); *In re Lamberti*, 192 USPQ 278 (CCPA 1976); *In re Kohler*, 177 USPQ 399. A reference is not limited to the working examples, see *In re Fracalossi*, 215 USPQ 569 (CCPA 1982).
